

ANDREA WINKLER

Andrea Winkler is a registered professional planner with Urban Strategies Inc. She is a skilled project manager with experience in coordinating both development approvals processes and city-wide Official Plan and visioning projects. These projects range in scale, geography and issues that are unique to their location. She has worked in cities across Canada, in Ontario, BC and Saskatchewan.

Andrea has carried out a range of development applications and planning studies within the City of Toronto. In addition to feasibility studies and planning rational reports, Andrea has prepared two Avenue Segment Studies for sites along Queen Street West. These Avenue Segment Studies were successful in demonstrating that the development proposals were of appropriate height and density.

Andrea regularly teaches planning workshops through the Faculty of Environmental Studies, planning program at York University.
