Fanshawe College
London, ON**

CRAIG LAMETTI

Trained as a planner and urban designer, Craig views good urban design as a tool to creatively balance both the short and long-term conditions of our towns and cities. Educated as a planner at Ryerson University in Toronto with a diploma in Urban design from Fanshawe College in London Ontario and Masters in Urban Design from University College London in England, Craig is a strong believer in the value that a cross disciplinary approach to design can bring and the need for a transformative enabling, flexible approach to urban design.

Craig's professional practice in both Canada and the UK has provided him with the opportunity to work on a wide variety of projects in a multitude of contexts. At Urban Strategies, Craig is currently involved in a number of projects including a density and development review for the City of Vaughan in anticipation of a future subway extension and the development of a Master Plan for the Escarpment District in Ottawa.

Always excited to share and spread his interest in urban design with others, Craig has been an instructor of Urban Design at the Ryerson University, School of Urban and Regional Planning in Toronto since 2004 and has appeared on a number of occasions as an invited external critic at the Bartlett School of Architecture's MSc Urban Design program in the UK.
