

## **DENISE MOYLAN**

Denise is an urban planner who brings a multi-disciplinary perspective to her projects, reflecting her experience in regeneration and development, economic development and programme and project management. Having worked on a range of projects in the United Kingdom, Europe, Canada and the United States for both the public and private sectors, she is skilled in master planning, research, policy analysis and stakeholder engagement in a variety of contexts. This range of experience allows Denise to approach project challenges from multiple perspectives and to appreciate the complexity of urban and spatial development.

### **EDUCATION**

**2000**

**Master of Science Planning  
University of Toronto**

**1998**

**Bachelor of Arts (Honours),  
Sociology  
Queens University, Kingston, ON  
Canada**

Denise's skill in balancing complex interdisciplinary requirements to achieve successful outcomes has benefited from her involvement in a number of large planning and implementation projects. She recently completed a 10 month secondment to Union Railways North where she provided programme management services. Working closely with a diverse group of stakeholders, including URN, London & Continental Stations and Property, Denise designed tools and processes to assist stakeholders in meeting delivery deadlines with a particular focus on the substantial completion of St. Pancras International. Prior to this, Denise managed a number of large-scale master planning projects encompassing areas poised to undergo significant change. These include waterfront master plans aimed at repositioning key community resources as investment opportunities, such as the Hastings and Bexhill Seafront Strategy and the Saint John Inner Harbour Land Use Plan and Implementation Strategy, and a campus master plan. Denise's town centre regeneration experience includes the Niagara Falls Strategic Master Plan and the Skyline Park Revitalisation Initiative. She has also been involved in a number of development approval projects. Each of these master planning and approvals projects have required an ability to develop consultation and communication plans that are relevant to the project and the community of stakeholders.

Denise's planning and implementation experience has benefited from the knowledge she has gained from a number of research projects. These include studies for the European Commission on sustainable development indicators and priorities for infrastructure investment under the Cohesion Funds. She has also undertaken research on the financing mechanisms employed by UK, American and Canadian governments to support urban regeneration and policy tools used for managing growth in North America.
