

NASIM ADAB

Trained in both Architecture and Urban Design, Nasim strongly believes that a good urban environment can be both a reflection of, and positive influence on, a democratic and healthy society. She considers a variety of different scales of design in her work and is inspired by urban design that can structure quality of life by providing open spaces and mixed use areas where people can gather, especially where technology and the fast pace of life have diminished time and opportunities for meaningful human interactions.

Studying and working in Tehran and later in Toronto has given Nasim opportunities to learn in these uniquely diverse cities. She enjoys working on different types of projects to gain new experience in different aspects of design and is currently working on a diverse range of projects, including Midtown Oakville, University of Waterloo Campus Master Plan and a plan for a Sustainable Halton.
