

Sean Quin

Model Maker, Visualizations Expert

Sean Quin provides a wide variety of visualization and modelling services at Urban Strategies and has taken part in many public consultation engagements and workshops. Sean creates a range of sophisticated visual layouts, computer and physical models to test designs and build community participation and consensus.

Most recently, Sean has developed digital and physical models for major institutional, public and private sector redevelopment and master planning projects including for University of Toronto and Princeton, for LRT corridors, and for neighbourhood plans in Ottawa, Pickering and Edmonton.

Sean has also participated in numerous charrettes and community workshops, including for the Ontario Growth Secretariat Youth Engagement Workshops, Durham Region TOD and the Niagara on the Lake Old Town Vision and Secondary Plan.
