

Warren Price MRAC Partner

Warren Price, an Urban Designer and Partner at Urban Strategies, is trained as an architect and has over 29 years of professional experience in urban, campus and community design and planning. This includes all aspects of project development such as; facilitation and coordination, site contextual analysis, detailed design and vision concepts; master plans; transportation oriented development plans; and urban design and streetscape design guidelines.

His experience encompasses a substantive variety of urban and rural settings, across North America, the UK and Asia. He is adept at positioning development initiatives within the economic and political context of these places. His breadth of experience allows him to critically assess and integrate new ideas with established development formats.

Warren also has a thorough understanding of the design and planning issues facing post-secondary educational institutions today. He helps institutions define planning directions and realize development priorities. He has led, designed and managed numerous campus and facility master plans including plans for Princeton University in Princeton, New Jersey, Cornell University in Ithaca, New York, and Queen's University in Kingston, Ontario. He maintains ongoing working relationships with each of these clients and has played a diverse range of roles. He is currently leading the campus master planning for Simon Fraser University (SFU) in Burnaby, BC and is also planning of a portion of SFU's Surrey campus.

Warren has prepared master plans for the downtowns of Hartford, Connecticut, Charleston, South Carolina and St. Albert, Alberta. He led the Bathurst Quay Neighbourhood Precinct Plan on Toronto's waterfront. These plans focus on creating opportunities for growth and reinvestment while supporting a traditional urban environment. He has also contributed to several Heritage Conservation District Studies within Toronto.

His new community planning and design has focused on sustainable best practices and includes Sustainable Halton, the Region of Halton's growth plan and several new city plans in Asia. He is currently leading the planning and urban design of the Courtice Employment Lands and the Southwest Courtice new community for the Municipality of Clarington.

His transportation oriented work includes design guidelines for arterial roads in the regions of Halton and Durham in Ontario, as well as a transit oriented development opportunities analysis for the Regional Municipality of Halifax, Nova Scotia. His Markham Centre/ East Precinct Plan integrates several modes of transportation into a "mobility hub" and sets the stage for further private development.

Warren regularly speaks at conferences and is a faculty member of the Institute without Boundaries, George Brown College, Toronto. He is also a member of the Royal Architectural Institute of Canada.
