

Ksheel Shetty BAS
Architectural Design Technician

Ksheel is an Architectural Design Technician with a background in Architecture and a specialization in Urban Design from Carleton University. He is currently working on a variety of projects in both the private and public sector all over the Toronto area. He is responsible for the creation and graphic visualization of planning documents, computer modelling, and model making. He is currently involved with the East Harbour Master Plan, a major redevelopment near Toronto's Port Lands, providing visualization aid to the design plan. Additionally, he has professional experience optimizing BIM models and technical drafting for the Sants Estacio Transportation Hub Redevelopment in Barcelona.
