

Siqing Hu Urban Designer

Siqing is an Urban Designer with a background in urban design and urban planning, based in our Toronto office. Siqing has participated in many urban planning and urban design projects in southern China in collaboration with international partners. Siqing's project experience includes a range of public space interventions, systematic urban renewal strategies, urban boundary analyses, with many projects integrating eco-technology, sustainability and climate strategies. She is respected for her outstanding communication, organization, and project management skills.
